New International Reciprocity

MISSION HILLS
觀瀾湖

Signing of Reciprocal Club Arrangement between Sherwood Hills Golf Club and Mission Hills Resort. With Atty. Harry Paltongan, President of SHGC and Ms. Yvonne Tang, Mission Hills Resort Director for Business Development. With the Directors of SHGC, Atty Basilio Almazan, Sonny Berdin Jr., Jerry R. Rubis and the General Manager of SHGC, Shin Paul Chan. Held in Mission Hills Dongguan, China last August 28, 2017

Irrigation Pump and Controller

The Irrigation pump and controller is primarily used for the irrigation of the golf course. Upon installation some years back, the system is in automatic transmission. However, due to unforeseen circumstances, the system broke down and the club was not able to fix the whole system due to insufficiency of funds.

For the longest time, it is operated manually by our staff. Water pressure going to the pipes can no longer be regulated thus resulting to busted irrigation pipes and couplings. The club had suffered too much on electricity and manpower expenses brought about by the breakdown.

The Club's order of battle this year is to bring back the IPC into automatic mode which we proudly did. The automatic irrigation system will not only control the water pressure but ultimately keep the electrical cost down to a minimum while sustaining our golf course's water requirements.

The Green House

The Green House project came into conception after the Club has opened its door to non golfing events. As we continue with these events, the demand for flowers and other arrangements have increased drastically. Since there are limited suppliers for fresh flowers within the nearby Towns and Cities, we deemed it necessary to propagate our own flowers and other aromatic plants and use them for these special events.
